\$18⁸⁰ each

F.O.B. Troy, Ohio

Packed.....4 to a carton

Weight30 lbs. per carton

CHAIR No. AT-10

CHROME ALUMINUM

is a new and very desirable development in the manufacture of tubular metal furniture. It combines the featherweight lightness of aluminum with its corrosion-resisting qualities, plus the bright, gleaming brilliance of chromium.

To add beauty and durability, the finest Nylon has been used for the seats and backs. That means the ability to withstand hard wear, to resist the weather, to retain its shape, to be comfortable and pleasing to the eye.

There is much "buy-appeal" in these two new items.

Ideal for restrooms and inside or outside solariums.
